

Exemption Exams: Electrical

Students that are successful in this program earning all four of their in-school credits and a minimum of 2 Coop Credits will earn a Concentrated OYAP pre-Apprenticeship Certificate. This indicates that the students have successfully completed the Concentrated OYAP Program.

All students may challenge the Ministry of Training, Colleges and Universities exemption exam. However it is recommended that only students, who have earned a minimum of 70% on all units with an overall average of 80%, consider writing this exam. Students with an overall average of 80% will earn a Concentrated OYAP pre-Apprenticeship Certificate with Honours.

Students who are successful in challenging the exemption exam will be granted a Concentrated OYAP Exemption Certificate. Passing this exam means students may be exempt from the first level of Apprenticeship Training. (For Electrical OYAP, it is not recommended to challenge the exam because of the high risk nature of the trade)

Please note the college may charge a fee for administering this test.
